```java
 1 package model.catalog;
 2
 3 import java.sql.Blob;
 4
 5 public class Category {
 6
 7     private String name, description;
 8     private int id;
 9     private Blob picture;
10
11     public Category() {
12     }
13
14     public Category(String name, String description, int id, Blob
   picture) {
15         setName(name);
16         setDescription(description);
17         setId(id);
18         setPicture(picture);
19     }
20
21     public String getName() {
22         return name;
23     }
24
25     public void setName(String name) {
26         this.name = name;
27     }
28
29     public String getDescription() {
30         return description;
31     }
32
33     public void setDescription(String description) {
34         this.description = description;
35     }
36
37     public int getId() {
38         return id;
39     }
40
41     public void setId(int id) {
42         this.id = id;
43     }
```

```java
44
45     public Blob getPicture() {
46         return picture;
47     }
48
49     public void setPicture(Blob picture) {
50         this.picture = picture;
51     }
52
53
54     public String toString() {
55         return String.format("Name: %s | Description: %s | ID: %s |
    Picture: %s \n", name, description, id, picture);
56         //fix this
57     }
58
59
60
61 }
62
```
